THE ASHEN SKIES OF THE BLUE PLANET, Near Iceland, April 22, 2010—

The volcano Akjlfdsjkafjdkshhgh went off last week some time.
Causing worldwide havoc.
Again.

[Where our hot planet stops, cools, and becomes the air –Ed.]

Iceland's revenge to the IMF and the rest of the EU that has fiancially (sic) ruined Iceland.

[Posted by Richard Harris @boston.com: April 18, 10 08:23 AM] [Act of Dog –Ed.]

Lava spews out of a mountain on March 21, 2010 in Hvolsvöllur in the region of the Eyjafjalla glacier in Iceland. (Fior Kjartansson/AFP/Getty Images)

[Correction: the volcano is called Eyjafjallajöku, which is the rough Icelandic translation of the American English 'Akjlfdsjkafjdkshhgh' –Ed.]
